# WHY SHOULD TRIDENT DAO PARTNER WITH SEA SHEPHERD?

**"IT TAKES A PIRATE TO STOP A PIRATE."**

- Captain Paul Watson, Sea Shepherd President

We should partner with Sea Shepards because of their unique and innovative ways to defending marine wildlife. They cooperate with local and international law enforcement agencies such as INTERPOL in order to document and investigate when laws are not being enforced. They prefer the hands-on approach, which means direct action on the High Seas. What is more, they are a movement, run almost entirely by dedicated and passionate volunteers. It doesn't involve bureaucracy and paperwork (we don't like that) - and that is why they are so successful. Their fleet of ships is prepared to fight like real good-guy pirates.

# WHY TRIDENT DAO AND SEA SHEPHERD ARE A GREAT FIT

---

Crypto is the financial revolution. We bring the change, we are the change. Sea Shepard operates under a similar principle, action-based change.

Through their direct campaigns, the environment of the ocean is changing - for the better. Partnering with them will enable us to save even more ocean ecosystem. Who knows, maybe thanks to this partnership, we will hear that they grew their fleet and saved not hundreds, but thousands of whales - this is a measurable action! This is measurable change!

Nowadays people are beginning to see the destruction of the ocean caused by humans. They want to change that. Alone, change can be difficult, but with our donations and their team, we can have a bigger impact. The number of people involved in crypto is increasing - this is a fact. Many of us are looking for a change. Sea Shepard, as an international effort, is already taking crypto payments to ease monetary friction. This partnership will put trident at the top of DAOs that actually fulfill their promises and work for a better world! It's a win-win. A trident DAO X Sea Shepard collab will have a long lasting, growing, measurable impact that we can truly be proud of.
